COMPONENTS OF PACKAGING:

1x the light (lower section with power cable, Ehmann dimmer,
reflector, upper glass section)
1x light source
1x cotton gloves
1x installation manual

WARNING:

The manufacturer assumes no liability for damage resulting from incorrect assembly. When unpacking the light, do so with regard for its material composition – the main components are made of glass.

Wear the cotton gloves included with the light when unpacking and assembling it.

Instalation time: 10 minutes / 1 person

CLEANING THE GLASS

BROKIS applies the highest possible quality standards in manufacturing its lights. Prior to shipping, each light undergoes several quality controls and stages of cleaning. Lights may require additional cleaning as a result of transportation, storage, and the amount of time that passes between packing in our plant and subsequent unpacking by the client. Therefore, we emphasize cleaning the lights prior to installation.

The glass must first be rinsed in hot water, with a dilution of a dish-detergent used to remove all foreign particles and dust. Eventually repeat this basic treatment, if necessary. Afterwards the glass must have a second cleaning using hot water, with a dilution of a de-greaser (such as ammonia or vinegar). The glass must then be thoroughly rinsed with running hot water. Eventually repeat this treatment, if necessary. The glass is then thoroughly dried with a paper towel or a clean soft cotton towel. Only re-assemble the glass to the lamp body, when completely cooled down.

Do not use mineral spirits, highly concentrated thinners, or other substances not intended for use on glass surfaces. Also: do not use products, containing silicones – since they will rapidly attract more dust and grease.

PRIOR TO SHIPPING, THE FUNCTIONALITY OF EACH LIGHT AND ITS COMPONENTS IS THOROUGHLY TESTED. THE MANUFACTURER ASSUMES NO LIABILITY FOR THE MISHANDLING OF PRODUCTS.

1. INSTALLING THE LIGHT SOURCE

Screw the light source into the socket.

2. ASSEMBLING THE LIGHT

Seat the upper glass section into the metal reflector. Position the glass carefully in order to avoid damage to it or to the metal reflector.

3. SWITCHING ON THE LIGHT

Plug the power cable into an electrical outlet and verify that the light works properly.
